

Muhammad Hasnain

Date of birth: 2003/08/31 | Phone: (+92) 3390809804 (Mobile) | Email address: muhammadhasnain004657@gmail.com | Address: Islamabad, Pakistan (Home)

About myself

Computer Science student and multidisciplinary tech professional with experience in **UI/UX Design, Figma, 3D Design, and MERN Stack Development**. Passionate about building real-world digital products and solving practical problems through design and development. Currently working as a **UI/UX Designer at Solexes Private Limited** and contributing to AI-focused product development.

Education & Training

Bachelor of Science in Computer Science (BSCS) | Shaheed Zulfikar Ali Bhutto Institute of Science and Technology (SZABIST), Islamabad, Pakistan | 2022/09/12 - Current | Islamabad, Pakistan

software development and programming (object-oriented programming, application development, problem solving) web technologies and mobile development (HTML, CSS, web systems, Android application development)

artificial intelligence and data science (machine learning basics, AI concepts, data analysis)

computer networks and distributed systems (network architecture, data communication, parallel and distributed computing)

professional and technical communication (technical writing, professional practices, teamwork and project development)

Level in EQF: 6

Skills

Design Skills | UI/UX Design | Product Design | Wireframing | Responsive Design | Design Systems | User Flows | Prototyping | Usability Thinking

Figma Skills | Auto Layout | Components & Variants | Variables | Dev Mode

Development Skills | MERN Stack Development | Frontend Web Development | React-native

Additional Technical Skills | SQL & Database Design | Version Control | Expo Go | Microsoft Office Suite | Problem Solving & Debugging

Certifications

CERTIFICATE IN INFORMATION TECHNOLOGY (CIT) — WEB SOFTWARE & MOBILE WEB
| NATIONAL VOCATIONAL AND TECHNICAL TRAINING COMMISSION (NAVTTTC)
2024/05/25

Web development fundamentals (HTML, CSS, JavaScript), frontend development (responsive UI/UX design), backend development basics (server-side programming and database connectivity), mobile web development (responsive applications), database management (basic SQL and data handling), software development practices (debugging, testing, deployment), version control and development tools, and professional IT skills (problem-solving, project

development, teamwork).

Work experience

UI/UX Designer | Solexes (Pvt) Ltd | 2026/02/03 - Current | Islamabad, Pakistan

Designed user-friendly interfaces for web and mobile applications
Created wireframes and prototypes using Figma and Sketch
Collaborated with developers to implement design solutions
Conducted usability testing and improved user experience
Maintained design consistency and updated application interfaces

Website: <https://www.solexes.com/>

Mobile Application developer | CMGL | Coopers & McGil | 2025/06/01 - 2025/08/31 | Istanbul, Türkiye

mobile application development (frontend development using React Native)
ui/ux design collaboration (designing and improving user interfaces using Figma)
team-based software development (working with the mobile app development team on project tasks)
frontend implementation (building and optimizing mobile app screens in React Native)
technical collaboration and learning (participating in development discussions and contributing technical ideas)

Website: <https://www.cmgl-x.com/>

Computer Operator & Web developer | Socialedge (SMC-Private) Limited | Islamabad, Pakistan

computer operations management (maintaining computer systems and ensuring smooth technical workflows)
web and mobile application development (developing and maintaining web and mobile applications)
team collaboration (working with development team to design and implement technical solutions)
problem-solving and technical support (identifying issues and implementing effective solutions)
software maintenance and updates (improving system performance and application functionality)

Projects

Hub for Skill Exchange & Collaboration | 2025/06/01 - 2026/02/01

Skill Exchange & Collaboration Hub – ReactJS | Node.js | PostgreSQL

Project Description:

Developed a web application to connect students and professionals for skill sharing and collaborative projects. The platform allows users to create profiles, list their skills, find collaborators, and join or propose projects based on shared interests. Built with a ReactJS frontend for a responsive and intuitive interface, Node.js backend for efficient API handling, and PostgreSQL for robust data management. Implemented authentication, user management, and dynamic project matching to enhance interaction and engagement.

Key Highlights:

Designed a responsive and user-friendly interface using ReactJS.

Developed RESTful APIs with Node.js for seamless frontend-backend communication.

Managed relational data, including users, skills, and projects, using PostgreSQL.

Enabled users to find collaborators and exchange skills efficiently.

Practiced full-stack development and team collaboration in a university project environment.

Quranic App | 2025/06/02 - 2025/08/31

Developed a Quranic mobile application aimed at enhancing the user experience for reading and exploring the Quran. Implemented key features using React Native, including interactive Surah navigation, search functionality, and bookmarking. Designed and refined intuitive UI/UX layouts in Figma to ensure accessibility and ease of use. Collaborated closely with the Mobile App Team to integrate frontend features, participated in technical discussions, and delivered project components efficiently within corporate timelines.

Key Highlights:

Built responsive and interactive screens using React Native.

Enhanced user engagement through thoughtful UI/UX improvements.

Contributed to a team-oriented agile development workflow.

Ensured timely delivery of assigned features in a professional environment.

Docutect AI | 2026/02/02 - Current

Designed the UI/UX for **Docutect AI**, a modern AI-powered document processing platform, focusing on a clean, intuitive, and user-friendly interface. Created user flows, wireframes, and high-fidelity prototypes to enhance usability and streamline interaction with AI features. Emphasized responsive design, accessibility, and a minimal yet futuristic aesthetic to improve user experience across different devices. Collaborated on design decisions to ensure smooth navigation, clear information hierarchy, and efficient task completion for end users.
